

Please have vaccines remain universally available.

This is the only way I've been able to be up to date with my covid vaccines and all of my flu shots since 2020.

I've not once contracted Covid thanks to the vaccines that were available to me.

Vaccines have helped me and my siblings live a normal life without the fear of contracting anything that could result in deadly consequences.

I am also grateful for vaccines because they protect my body from getting long term debilitating effects from illnesses that are all around us.

The ACIP must remain independent from RFK Jr. I do not trust him to have the health and safety of the Americans be in his best interest.

ACIP must maintain their universal recommendations to everyone even twice annually for covid vaccines.
